

# Capture, View and Share your Family History images with this Simple Device and your Smart Phone or Tablet!

Quick. Simple. Eliminates archive institution Service Fees.  
And minimizes Handling of Fragile Originals.

## INTRODUCING

FamilyClick™ is a digitizing and transferring device used in conjunction with your Smart Phone, Tablet, or Digital Camera in order to capture personal documents, pictures and artifacts. You can just call it your personal “Document Digitizing Pod”.

## WHO WILL LOVE IT?

- Professional/Amateur Genealogists
- Personal Family Historians
- Museum Archivists
- Librarians
- Church History Centers
- Family History Consultants
- Graphic Designers/Art Directors

## WHY WAS IT DEVELOPED?

Ed Dittmar — a Coeur d’Alene, Idaho rocket scientist, engineer, professor and inventor — recently served a mission in Europe for the Church of Jesus Christ of Latter-day Saints (a renowned world resource in genealogical research).

Assigned to develop and construct digitizing equipment for the church’s Europe Area archives, he gained deep experience in high-end digital imaging.

Dittmar was urged by regional family history authorities to develop a small, fold-able, easy-to-use, low priced tool that library patrons, and personal family historians could use to digitally capture, instantly view, and share documents, photos and artifacts with family members, friends, church archives, colleagues, students and others.

## THE RESULT: FAMILYCLICK™

FamilyClick™ is a quick, easy to use, low cost tool that makes it possible to digitize family records, photos, drawings, illustrations and artifacts with quality that rivals or exceeds that of many flatbed scanners!
